

ASP HD Hybrids – a never ending list of Sealing & Bonding opportunities

Construction	Industry	Do it Yourself	Speciality
			
Façade sealant Glazing Sealant Panel bonding Waterproofing Tile Adhesive ...	Truck Panel bonding Automotive sealant Marine applications Solar energy Powder Coating Adhesive ...	Multi-purpose sealant Multi-purpose adhesive D4-wood adhesive High Tack adhesive ...	EPDM Adhesive Fire Resistant Adhesive ...

Our HD portfolio is based on our in-house developed and produces SPUR Polymers.

- HD225** ●● Our low Modulus (25LM) construction hybrid with excellent movement capability.
- HD245FC** ●●● Our universal sealing & bonding hybrid for a broad range of applications. HD245FC has a Shore-A of 45.
- HD260FC** ●●● Our universal sealing & bonding hybrid for a broad range of applications. HD260FC has a Shore-A of 60.
- HD260HGT** ●●● Our high tack hybrid with excellent initial grab.
- HD260Plus** ●●● Our tack hybrid with excellent balance between tool-ability and tackiness.
- HD145** ●●● Our crystal clear hybrid.
- HD295** ● Our hybrid for coating applications.
- HD525** ● Our sticky hybrid, for permanently elastic bonding of construction foils, connecting tapes and vapor barriers. The product remains elastically deformable and permanently tacky.
